

A Phycox® Joint Supplement for Every Canine Patient

Phycox® Soft Chews Joint Supplement –

The original formula is recommended for active dogs and dogs of all ages who require a moderate level of joint support.

Phycox® MAX Soft Chews Joint Supplement –

Recommended for sporting and working dogs and dogs of all ages who require a maximum level of joint support. Phycox® MAX Soft Chews Joint Supplement contains six additional active ingredients and 3X the phycocyanin as compared to Phycox® Soft Chews Joint Supplement to aid in senior health and advanced joint support.

Phycox® HA HypoAllergenic Soft Chews

Joint Supplement – Developed for dogs with food sensitivities or intolerances. Phycox® HA HypoAllergenic Soft Chews Joint Supplement uses hydrolyzed vegetable protein derived from soybeans, and do not contain beef, chicken or wheat.

Phycox® HA HypoAllergenic MAX Soft Chews

Joint Supplement – Phycox® HA HypoAllergenic MAX Soft Chews Joint Supplement contains the same hydrolyzed vegetable protein as Phycox® HA HypoAllergenic Soft Chews Joint Supplement, in addition to six more ingredients and 3X the phycocyanin for maximum support of joint health.

Phycox® Small Bites and Granules Joint

Supplements – Developed for dogs under 30 pounds or for dogs who may not eat the larger Phycox® Soft Chews Joint Supplements.

Phycox® Joint Supplements Now
Carry the NASC Quality Seal

The One Joint Supplement FOR EVERY CANINE

A Joint Supplement Developed Specifically For Dogs

As dogs live longer, they show many of the same signs of aging their owners do — including joint discomfort. And many of the same supplement ingredients that pet owners use can be formulated to help their pets. That's why we specifically developed the family of high-quality Phycox® Joint Supplement formulations for dogs. Phycox® Joint Supplements combine phycocyanin, a natural antioxidant, in addition to a broad range of antioxidants, omega-3-fatty acids, and a blend of beneficial ingredients to support joint health.

The Only Canine Joint Supplement With Phycocyanin

Phycox® Joint Supplements provide a comprehensive blend of beneficial ingredients for joint health – phycocyanin, glucosamine, MSM, additional antioxidants, creatine and more. Phycocyanin is a natural antioxidant, derived from blue-green algae, that has powerful free radical scavenging properties. Free radicals cause cellular damage and inflammation; phycocyanin supports the body's normal defense against the harmful effects of these free radicals.. And only Phycox® Joint Supplements have it. (The use of phycocyanin in canine joint supplements is covered by US Patent 7,025,965)

Dogs Love the Taste of Phycox® Joint Supplements

Most dogs love the taste of Phycox® Joint Supplements. In fact, we guarantee the palatability of our products when purchased from your veterinarian. If your dog refuses to eat the supplement, just return the unused portion to your veterinarian for a full refund or replacement.

The One Joint Supplement For Every Canine

For years, veterinarians and pet owners have trusted the Phycox® Joint Supplement brand as an oral supplement that offers pet owners a clear option for the health of their dogs. Phycox® Joint Supplements offer comprehensive formulas that help maintain healthy cartilage and joint mobility in dogs, young and old. As joint discomfort decreases, many dogs become more playful – you'll see the difference in your pet.

NASC Quality Seal

The entire line of Phycox® Joint Supplements carries the NASC Quality Seal from the National Animal Supplement Council. The Seal is a way for pet owners to know that when they buy a product carrying the seal, the product is made by a reputable company that has successfully completed a facility audit, and implemented specific quality standards. NASC members must agree to adhere to NASC's standards, including routine, independent audits to ensure conformance with the quality system requirements. Further information about NASC is available at <http://nasc.cc/>.
